➢ **Databases**- MongoDB, Postgres

PROFILES

➢ **Leetcode**
➢ **HackerRank**
➢ **GFG**
➢ **GitHub**

PROJECTS

➢ **OneCode (HTML, CSS, Javascript)** | **Link**
• Built an online code editor named OneCode using HTML, CSS, and JavaScript. OneCode offers a versatile and interactive code editor that supports HTML, CSS, and JavaScript. As developers type their code in the editor, they can instantly see how their changes affect the output on the live preview pane. This real-time feedback is particularly useful for fine-tuning designs and responsiveness.

➢ **Cara(HTML ,CSS, JavaScript)** | **Link**
• Built a Front-End ECommerce website named Cara using HTML, CSS, and JavaScript. Used advanced CSS features(without any frameworks) to give a classy and well-established look and feel to the website.

➢ **Travel Bee (React Js)** | **Link**
•Built a front-end fully responsive website named Travel Bee using ReactJS where customers can see the holiday packages provided. If interested the customer can fill up the form given on the website. It has multiple pages like Home, About, Service and Contact Us.
